

## Get energy efficiency plus performance—no matter where you are.

Owens Corning™ now offers a full line of ENERGY STAR® rated shingles that provide all the protection you expect plus the increased energy efficiency you demand. Available nationwide, our ENERGY STAR® rated shingles come in a variety of solar-reflecting colors.

### ENERGY STAR® is for roofs too.

Similar to the energy-efficient appliances in your home, roofing products can provide energy-saving qualities. Owens Corning™ ENERGY STAR® rated shingles can help reduce your energy bills when installed properly. These shingles reflect solar energy, decreasing the amount of heat transferred to a home's interior—and the amount of air conditioning needed to keep it comfortable. Actual savings will vary based on geographic location and individual building characteristics. Call 1-800-GET-PINK® or 1-888-STAR-YES for more information.

Cool Roof Rating Council (coolroofs.org)

ENERGY STAR® rated shingles reflect solar energy, decreasing the amount of heat transferred to a home's interior—and the amount of air conditioning needed to keep it comfortable.

### Saving energy has never looked—or felt—better.

Utilizing lighter, highly reflective granules that bounce back the sun's rays, ENERGY STAR® rated shingles help keep roofs cooler, resulting in a more comfortable living space below. In addition, ENERGY STAR® rated shingles:

- Help lower energy bills by keeping the roof cooler—which also reduces wear and tear on the air conditioning system
- Can reduce environmental impact—less energy needed to cool a home means less energy consumption, decreasing CO<sub>2</sub> emissions
- Help extend the life of the roof—thanks to solar-reflecting granules that reduce shingle temperature and subsequently slow asphalt aging
- Meet 2008 California Title 24, Part 6, requirements, which call for a Cool Roof or equivalent improvement. For more information, visit [www.roofing.owenscorning.com](http://www.roofing.owenscorning.com)
- Are rated by the Cool Roof Rating Council (CRRC)
