

WeatherLock® Cold Climate

Waterproofing Underlayment with Dual-Layer Composition

Eaves

Valleys

WeatherLock® Cold Climate waterproofing underlayment is designed for cold weather adhesion and flexibility.

- Top layer asphalt composition reduces the number of loose granules, allowing for better traction
- Helps prevent damage from ice damming and wind-driven rain
- One of six specifically designed waterproofing underlayments, each engineered to help provide a solution to every application need

WeatherLock® Cold Climate
Waterproofing Underlayment

Construction

Surface

Granulated asphalt surface

Interior Reinforcement

Durable Fiberglas® mat

Adhesive Styrene

Mixture of Styrene-Butadiene-Styrene (SBS) and asphalt

Removable Backing

Split-sheet peel-away backer sheet

Applicable Standards and Codes

ASTM D 1970

IBC 2003

IRC 2003

UL Class A

UL Class C

Typical Values*

Property	1.5 sq. roll
Length	50 ft. (15.24 m)
Width	3 ft. (.91 m)
Area	150 sq. ft. (13.9 m ²)
Nominal Thickness	55 mils
Weight	54 lbs.

* All values are approximate.

The benefits of a healthy roof

For optimum durability and beauty, a complete and healthy roofing system requires hip & ridge shingles, ventilation products, shingles and waterproofing underlayment products.

- a. VentSure® Ventilation Products.** Help protect the roof from moisture damage, such as warping and cracked shingles, by releasing heat from the attic.
- b. Hip & Ridge Shingles.** An attractive way to help protect the ridge vents so they can better do the job of preventing moisture damage to the roof deck.
- c. WeatherLock® Waterproofing Underlayment Products.** Help guard vulnerable areas where water can do the most damage to a roof: eaves, valleys, dormers and skylights.
- d. Owens Corning Shingles.** Add durable beauty to the home. Shingles are the first line of defense against the elements.
- e. Owens Corning Starter Shingle Products.** The first step in the proper installation of shingles.
- f. Owens Corning Undereave Ventilation Products.** Help prevent moisture buildup in the attic by working with ridge vents to keep air moving.
